

The Bale Band-it™ is an automatic bundling system that takes small square bales directly from the baler, or off the ground, and bundles them together into easy to handle 18 or 21 bale bundles.

You Asked, We Answered!

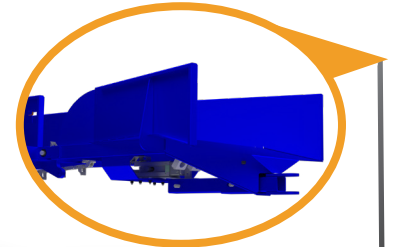

1. Improved Position Sensing
on strap guide arm and vertical plunger.

2. Banding Feed Assist

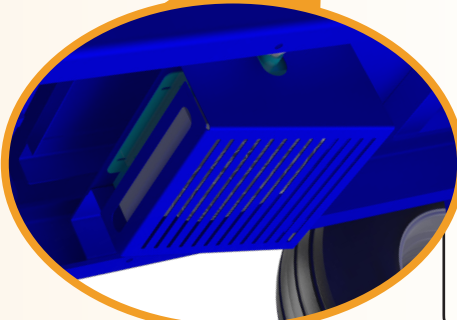

helps users efficiently reload banding materials, increasing productivity and speed.

4. Surge Brakes

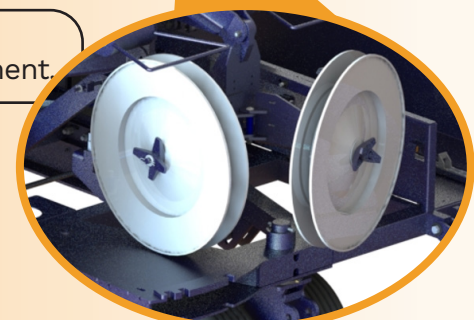

5. Additional Banding Drum Storage
allows the farmer to stay in the field longer.

A Closer Look

6. Hydraulic Oil Cooler
reduces the likelihood of hydraulic fluid overheating or thinning during operation in the field, greatly improving overall performance.

3. Hinged Drum Feeder
for easier band replacement.

USA is our home...

We understand farming because most of us have lived it. We know how important equipment is and how much it hurts when equipment fails. That's why the Bale Band-It and all related equipment is engineered, manufactured, and assembled in the United States in a state-of-the-art facility so we can continue to make the best bale bundling system in the world.

We are here for you...

At our US facility we do everything including laser cutting, CNC milling, press brake bending, and powder coating operations. Additionally, to keep you running in the field we keep a highly trained US based service team to handle all your needs directly. Our parts department keeps an extensive list of parts on hand for fast shipping across the country.
